Join our team as

MOBILE APPLICATIONS DEVELOPER

Your mission:

As a developer of mobile applications at ELCA, you will be working on challenging projects for a wide range of customers, on iOS, Android and Windows Phone. You will be responsible for building attractive, efficient, and responsive applications for tablets and smartphones. Building on your experience, you will also participate in the preparation of commercial proposals and other customer-facing activities.

Your profile:

You hold a degree in Computer Science, Information and Communications Technology or Software Engineering, and already have a proven experience in the design and development of mobile applications. You are passionate about user interfaces, web design, information architecture, and application performance. You have strong skills in software engineering, design patterns, coding, and testing.

You are familiar with the following tools and technologies, and an expert in a few of them:

- The software ecosystem for at least one of the main mobile platforms we are targeting: iOS, Android, Windows Phone.
- Mobile application development frameworks such as Sencha Touch, PhoneGap, JQuery mobile, Sybase, RhoMobile, or others.
- Advanced HTML, CSS, and JavaScript.
- Web formats and protocols: JSON, XML, HTTP, SOAP, WSDL, etc.
- Web application security: OWASP and ESAPI.
- Service-oriented and REST architectures.
- Server environments like Apache, Tomcat, JBoss, Websphere and Weblogic.
- Relational and noSQL databases.
- Automated testing and continuous integration.

A knowledge of other development platforms (JEE, .NET, Flash/Flex/AIR) is certainly a plus. You should also be comfortable working both with agile (Scrum) and structured methodologies, have good time-management skills and be able to accurately report progress on projects. Technical excellence, flexibility, a strong team spirit, as well as good spoken and written communication skills in French, German and English are essential.
