

# Cybersecurity for International organizations and NGOs

**ELCASecurity**  
AN ELCA COMPANY

With ELCASecurity and Senthorus, the two new Swiss-based entities entirely dedicated to cyber security, ELCA renews its commitment to customers. International organizations and NGOs are involved in international development, humanitarian issues, human rights work, etc. They hold vast amounts of valuable information, often for matters of life and death. However, they can be the ideal victim for the cybercriminals as an easy target who has a lot to lose. ELCASecurity's and Senthorus' mission is to accompany The International organizations and NGOs on their cybersecurity journey and to protect confidentiality, integrity, and availability of their data.

## Examples of challenges

### Cloud Environment

ELCASecurity helps international organizations and NGOs along their journey to/in the Cloud while building and implementing secure and compliant cyber strategy, providing advisory, architecture and operational support aligned with security best practices.

### Data Security and Protection

Data security and protection of individuals (beneficiaries, donator) is key for international organizations and NGOs: for beneficiaries, it is an integral part of the protection of their life – for donors, it is a matter of maintaining trust and funding your cause. ELCASecurity supports international organizations and NGOs in this Data Security & Protection journey from requirements implementation, passing through toolings with authentication and encryption, to assessment and audit.

### Third party management and MSSP/SOC

Because controlling the security of external ecosystems is important in international context, Senthorus (MSSP-SOC) monitors on a 24/7 mode the malicious activities, controls the security level of third parties (eg providers, suppliers, partners) and manage incident response. Reviewing contractual strategy to cover the gaps can also be offered to support our customers.

### Crisis Management

Active preparation and anticipation steps are as fundamental as the reaction and incident responses phases to face a crisis. ELCASecurity provides practical and easy to use crisis and incident response plans, including services

## Examples of Services

### Managed Security Service Provider and Security Operation Center for IT/OT

A Swiss based and dedicated monitoring center to supervise in real time 24/7 the security level of your information system, manage and maintain security platforms.

### Awareness Program

Provide your collaborators an understanding of the security challenges and teaching them the most efficient reactions thanks to trainings and exercises.

### Cloud Security

Support all your projects to/in the cloud, assess your security and compliance levels, but also monitor your operational security

### Data protection

Support you with all data protection compliance aspects through a governance and specific mechanisms.

from assessment and enhancement of processes through tabletop exercises to incident response activity thanks to Senthorus (SOC).

## *ELCA Cybersecurity Services added value*

### **Our Services dedicated to international orgnaizations and NGOs**

To tackle the security challenges, ELCA Security offers the following actions:

Key actions	Your security challenges							Value proposals**
	Cyber Strategy, conformity and regulations	Awareness and crisis management	Assets* and data management	Security monitoring and incident response	Access management	Cloud security and compliance	3rd-party management & e-reputation	
Security assessments	✓	✓	✓	✓	✓	✓	✓	Business and technical risk analysis (ISO27001, NIST), "People, Process & Technology" evaluation, security recommendations
Governance support	✓	✓	✓	✓	✓	✓	✓	Strategy definition and roadmap, conformity and compliance support (GDPR and other regulations...), cloud secured migration, secured agreements (SLA, RFP...), processes definition
Trainings and exercises	✓	✓		✓				Top table crisis exercises, awareness and conformity trainings (GDPR...), security exercises (phishing campaign...)
Environment* management		✓	✓	✓	✓	✓	✓	Inventories of assets, devices and 3rd party security deviations, abnormal behaviors, management of security solutions
Data protection	✓		✓	✓	✓	✓	✓	Data inventory (data catalog), data classification, data governance, regulations, roles and accesses definition
Security solutions		✓	✓	✓	✓	✓	✓	Encryption (HSM), IAM (SSO, MFA), FAM, PAM, eID, endpoint and server protections, GRC (0-Trust), API, SAST/DAST, Cloud protection, OT environment protection
Supplier management			✓	✓	✓	✓	✓	Scans tools and remediation plans, 3rd party management
Events correlation and alerts monitoring			✓	✓	✓	✓	✓	24/7, Swiss-based SOC : Logs collection and correlation, alerts definition and filtering
Incident Management		✓	✓	✓	✓	✓	✓	24/7, Swiss-based SOC : Forensics tools, playbooks and processes follow-up and improvement

\* All IT/OT/IoT environments and assets (hardware, software)

\*\* The listing of values is not exhaustive

### **Benefits:**

- **Value proposal** : the most adapted and customized security processes and solutions to fit with your cybersecurity needs and budget thanks to our strong security experience and our trusted partners.
- **Security expertise** : more 30 technical experts with deep banking environment experience to support our customers during their cybersecurity projects.
- **Ethic** : Proof of the due-care and due diligence of your company in terms of information security.
- **Trust** : ELCA Security and ELCA Group can support you all along your cybersecurity and also your IT journey
